Farm Contents Valuation Guide

Farm Contents Valuation Guide

Underinsurance can be a big problem at claim time, so it's important you have the appropriate cover for your farm contents. Once you know what your property is worth, it's easier to work out the level of cover necessary to provide you with peace of mind.

How to estimate the value

We've shown the approximate value of most items you may have around your farm. These figures are indicative only and intended to help you estimate the value of your farm contents. For smaller items we've grouped values to the average per farm.

In the column headed 'Your Farm', note down the cost you believe it would be to replace the item. Items are either insured for replacement or present day value. Items marked with a v can be insured for present day value only, and policy limits apply to items marked with an *. Please refer to your policy document for further details.

It is always good to review your contents at least once a year. To ensure your farm contents are adequately insured, contact your local Client Business Manager or call us on 0800 366 466 to arrange the cover that's right for you.
