

Arable Crop Cover

FMG's Arable Crop policy enables you to insure a variety of crops against accidental loss resulting from a defined event or events.

Our Wheat Growers Scheme top up cover is ideal for wheat growers requiring cover over and above the per tonne benefit automatically provided by the United Wheat Growers (NZ) Ltd Statutory Scheme.

You can choose to insure your growing crop for either

“Crop Fire”

Accidental Loss to growing crops caused directly by

- Fire or lightning

“Crop Expanded Perils and Fire”

Accidental Loss to growing crops caused directly by

- Fire or lightning
- Hail
- Frost occurring from the 15th November
- Impact by vehicles or aircraft
- Windstorm

A claimable loss caused directly by Frost, Hail, Windstorm or impact by Vehicle or Aircraft must exceed 30% of the potential yield of the crop during the period of insurance

Harvested Crop Automatic Benefit

Accidental Loss for your harvested crop either in storage or transit within New Zealand during the period of insurance for a period of 12 months from the date of harvest, or when you no longer have an interest in that crop, whichever is earliest

Insurance Periods

- Crops must be planted prior to the 15th December in the season it is insured for
- The inception date of insurance is shown on your certificate and cover begins when your crop is fully emerged and fully established
- Frost cover commences on the 15th November during the period of insurance
- Maize: Cover ends at 4pm on the 31st August, or when harvested, whichever is earliest
- Any other crop: Cover ends at 4pm on the 30th June, or when harvested whichever is earliest

What we will pay

- If you suffer a loss covered under the policy within 40 days of planting, we will pay you 80% of the reasonable costs of replanting the damaged area in that same crop
- If your damaged crop is wheat, we will only pay the value of your yield loss over and above the amount you are entitled to receive from the United Wheat Growers (NZ) Ltd statutory scheme
- The crop policy is ‘Subject to Average’ if it is insured for less than 85% of its estimated yield at the time of loss. When ‘Subject to Average’ applies, the amount you recover for a partial loss will reduce by the percentage that you are uninsured
Example: Your property is worth \$20,000. You insure it for \$10,000. You suffer a loss of \$5,000. If your policy is ‘Subject to Average’, the maximum amount that you may recover will be \$2,500

We also provide cover for

- Orchard Fruit
- Vehicles
- Liability
- Farm buildings and contents
- Personal home, contents and vehicles

Growing and harvested crops that can be covered include

African Marigold (seed)	Carrot	Evening Primrose	Lupin	Potato (new)	Swede

Cabbage (seed)	Dogstail	Lotus	Phalaris	Sulla Potato (seed/maincrop)	
Canary (seed)	Echinacea,	Lucerne	Plantain	Sunflower (seed)	

The FMG difference

FMG has its roots firmly planted in rural New Zealand, which is why you'll find that we're different when it comes to insurance. We were started in 1905 by farmers for farmers and growers, and today we're still 100% New Zealand owned by our rural clients.
